PRODUCT OVERVIEW & USER VALUE

Personal Health & Progress Dashboard

Empowering sustainable wellness through noise-free daily tracking and automated progress analytics.

THE CHALLENGE

Overcoming Daily Weight Noise

Water Weight & Fluctuations

Daily weigh-ins spike due to sodium, hydration, and meal timing—creating unnecessary frustration.

False Progress Signals

Single-day increases often hide real fat loss, leading users to abandon healthy habits prematurely.

CORE ANALYTICS ENGINE

Smoothed 7-Day Moving Averages

7 Days

Rolling Trend Smoothing

```
Trend = AVERAGE(Day_0 : Day_-6)
```

By plotting a continuous rolling average, the dashboard exposes true underlying trajectory—giving users reliable, stress-free feedback.

USER EXPERIENCE

Single-Point Daily Logging

Zero Navigation Friction

Log all daily health variables in under 60 seconds on one structured tab.

Automated Synchronization

Input updates KPI cards, charts, and milestones across all sheets dynamically.

FUNCTIONAL COVERAGE

Four Pillars of Daily Wellness

Weight & Body

Daily logs with smoothed trendline.

Nutrition & Target

Calorie tracking with target adherence %.

Activity & Steps

Daily step count and workout binary flag.

Sleep & Mood

Hydration, sleep hours, and emoji selector.

MOTIVATION & GOALS

Automated Milestone Achievement Engine

STAGE 1

25% Goal

First quarter marker unlocked.

STAGE 2

50% Halfway

Major progress benchmark reached.

STAGE 3

75% Final Stretch

Target weight within clear reach.

STAGE 4

100% Goal Met

Target weight fully achieved.

QUALITY ASSURANCE

Built-In Data Integrity & Validation

Zero Formula Maintenance

All dynamic logic wrapped in IFERROR and ISBLANK safeguards to prevent sheet corruption.

27-Scenario QA Tested

Fully verified against missing dates, zero values, single-day logs, and extreme inputs.

SYSTEM ARCHITECTURE

Dual Demo & Clean Template Design

01. Demo Suite

PRE-FILLED

Includes 30 days of realistic sample health logs demonstrating complete dashboard functionality immediately.

- Populated trendline charts
- Active milestone triggers
- Calculated adherence stats

02. Clean Template

BLANK

Ready-to-use clean workbook designed for immediate personalized end-user onboarding and daily operation.

- Zero pre-existing data
- Customizable start targets
- Pre-formatted log grid

ONBOARDING

Get Started in 3 Simple Steps

1

Make a Copy

Open Google Sheet link and save your personal template copy.

2

Set Targets

Enter starting weight, goal weight, and daily calorie target.

3

Log Daily

Spend 60 seconds each morning updating your daily row.

SUMMARY & NEXT STEPS

Ready to Track Sustainable Progress

Access the Google Sheet template, explore the QA test suite, or reach out with questions.
